

## SAME Forum Conference & Exhibition

October 12 & 13, 2011  
Sophia Antipolis, France

[www.same-conference.org](http://www.same-conference.org)

### University Booth at SAME'2011

#### Call for Demonstrations

As part of the SAME'2011 Conference, a University Booth will be organised for EDA software and hardware demonstrations. **A prize will be awarded for the best PhD student University Demo.** Universities, research institutes and government funded project consortia interested in demonstrating their hardware and software projects are invited to fill out and return the application form. All demonstrations will take place on Wednesday 12<sup>th</sup> and Thursday 13<sup>th</sup> of October 2011 within a dedicated time slot. The Conference, and the Exhibition including the University Booth, will be held in the Espaces Antipolis, in the centre of Sophia Antipolis Technological Park. This final paper will be included in the CDROM, published and distributed to all conference participants

#### EDA Software Demonstrations

EDA Software Demonstrations can be presented at the booth supported by electronics and other media. Each EDA demonstration should be supported by a poster (WxH: 0.9m x 1.4m). A table will be available for demos. There will be a few screens but the computers are the responsibility of the demonstrators.

#### Working Silicon Hardware Demonstrations

For chip demonstrations, the same services are available as for EDA software demonstrations (table and poster space). All chips must be demonstrated within a working environment. Each exhibitor is responsible for bringing and installing the hardware and software resources necessary for showing the entire functionality of the circuit. Each EDA demonstration should be supported by a poster. Each poster should contain a plot of the circuit complemented by any information on the functionality of the circuit, test results and working environment.

#### Deadline and address

The **deadline** for submission is **May 13<sup>th</sup>, 2011**. Abstract of the Function of the software or the circuit, test results and working environment (half A4 page) should be sent by e-mail to **both** [Gilles.Jacquemod@unice.fr](mailto:Gilles.Jacquemod@unice.fr) and [Fabien.Ferrero@unice.fr](mailto:Fabien.Ferrero@unice.fr). The **information of acceptance** will be sent out before **May 20<sup>th</sup>, 2011**. The final paper deadline is requested **June 3<sup>rd</sup>**.
