

Project manager

IPDIA is a recent start up company, spun off from NXP to industrialize Passive Integration technologies.

The staff consists of 100 people and the company is located in Caen, France. IPDIA will focus on two main activities: the production of LED bases and integrated passive devices.

IPDIA aims to transform the existing facility into a European center of excellence thanks to a unique 3D silicon fabrication process enabling the production of extremely small electronic components in response to the needs of the medical, energy, aerospace and defense markets.

IPDIA entered into close R&D partnerships with CEA-LETI and CNRS-LAAS to strengthen its technological position.

Responsibilities:

The project manager is an experienced project leader and is accountable for overall project implementation activities. Main responsibilities are the following ones:

- Define the objective, requirements, and assumptions necessary to structure a project or activity
- Plan, schedule and control activities to fulfill identified objectives applying technical, theoretical, and managerial skills to satisfy project requirements
